Conventional Heating Systems
About KERONE

KERONE is possessing experience of 40 years in engineering excellence.

KERONE is one of the most admired and valuable company for customer satisfaction.

KERONE is pioneer in application and implementation engineering.

KERONE is having immense expertise in manufacturing and implementing various types of heaters and dryers.

KERONE is possessing employee strength of more than 140 experts continuously putting efforts for happy industrial heating solutions.

KERONE has reported annual revenue of $8 to $10 Million, increasing year-on-year.
Our Vision and Mission

Vision

• Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.

• To attain global recognition as best of quality and environment friendly engineering solution company.

Mission

• To enhance the value of customer operation through our customer need centric engineering solution.

• We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

• We are company that believes in strong ethics and timely commitment helps to build long term relationship.
Value Propositions

- 40 years of rich experience
- Sound infrastructure
- Adherence to standards
- Timely delivery
- Highly customized product
- Cost effective solutions
- Team of experts delivering quality
- Great after sale support

Introduction of Conventional Heating System

Conventional Heating System transfers the heat from Material at higher temperature to Material having less temperature.

Conventional Heating Systems works on the principle of Conduction.

Heat is transferred from one surface to other by means if Air/Steam.

Conventional Heater as technique is having huge variety.

Conventional Heating is established technology.
Conventional Heating Systems are classified as based on:

- **Medium of Conduction**
  - Steam
  - Hot-Air

- **Type of operations**
  - Batch Type
  - Conveyorised Type

- **Firing Mechanism**
  - Fuel Fired
  - Electrical Fired
